

- KEY:**
- Catchment H
  - Catchment Boundary
  - Subcatchment Boundary
  - H5-A Flow Node
  - Potential Flooding Area
  - ← Overland Flowpath
  - Stormwater Network

- NOTES:**
1. Potential flooding areas have been developed based on 0.5m contour information and site observations.
  2. Extent of potential flooding shown in figure assumes the primary capacity is blocked and secondary overland flow occurs. Therefore, flooding areas do not relate to a specific design storm event.
  3. Refer Appendix B for pipe capacity analysis plans.
